

Thomson River System Fish Species

Golden Perch (Yellowbelly) are known to grow to 76cm. They will readily take lures, and deep diving minnows. Bait fishing is also popular using live shrimp and yabbies. Habitat: rocky points, snags and steep drop offs. Legal size: 30cm minimum

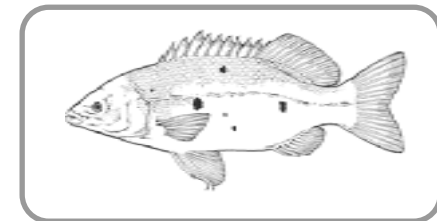

Catfish & Eel Tailed Catfish

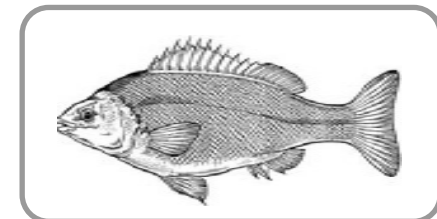

Preferred baits are mussels and shrimp. Habitat: gently sloping clay banks around mussel beds. Legal size: 35cm minimum

Barcoo Grunter commonly caught around 25cm to 30cm. It is believed to be an omnivore feeding on plant material, small fish, fresh shrimps and insects. Habitat: snags and rocky points. Legal size: 30cm minimum

Silver Perch (Bream) are usually caught between 35cm and 40cm. Commonly caught on baits such as worms and small shrimp, but they will take a small lure. Habitat: fringes of weed beds and twiggy standing timber. Legal size: 30cm minimum
